RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 36 pages. Original publisher: Washington, DC : U. S. Nuclear Regulatory Commission, 2010 OCLC Number: (OCOLOC)630752253 Subject: Nuclear reactor accidents -- Slovenia -- Krko. Excerpt: . . . An electrically heated pressurizer connected to one reactor coolant loop maintains RCS pressure during normal operation, limits pressure variations during plant load transients, and keeps system pressure within design limits during abnormal conditions. 2. 9 Auxiliary Systems Auxiliary system components are provided to charge the RCS and to add makeup water, purify reactor coolant water, provide chemicals for corrosion inhibition and reactivity control ( chemical and volume control system ( CVCS ) ), cool system components ( component cooling system ), remove residual heat when the reactor is shut down ( residual heat removal system ), change fuel and cool the spent fuel storage pool, sample the reactor coolant water, provide for emergency safety injection ( SI ), and vent and drain the RCS. 2. 10 Engineered Safety Features Systems Engineered safety features are provided to prevent accident propagation or to limit the consequences of postulated accidents that might otherwise lead to system damage and the release of fission products. The principal criterion for these features is that under the conditions of a hypothetical loss-of-coolant accident, the system can, even when operating with partial effectiveness, maintain the integrity of the containment and limit the potential offsite radiation dose to less than the values of applicable Federal regulations ( Title 10 of the Code of Federal Regulations ( 10 CFR ) 50. 34 ( a ) ( 1 ) ). The Krko NPP includes the following engineered safety features: containment spray system hydrogen control system emergency core cooling system component cooling water system essential service water system auxiliary feedwater system 5...
