Springer. Paperback. Book Condition: New. Paperback. 356 pages. Dimensions: 10.0in. x 7.0in. x 0.8in. From 11 to 15 July 1977 about 60 physiologists, endocrinologists, ecologists and other biologists from 14 countries convened at the University Montpellier for a symposium on Environmental Endocrinology. This meeting was organized as a Satellite Symposium of the 27th International Congress of Physiological Sciences, Paris, 18-23 July 1977. This volume is a record of the communications presented at the symposium. The objectives of the program were to examine the role of the endocrine system in a wide spectrum of adjustments and adaptations to changes in environmental conditions by various species of animals, including man, and to promote an exchange of ideas among investigators who have approached these functions from diverse aspects. The diversity of the information and ideas communicated is great. Of necessity, they represent only an extremely modest selection of the many facets of endocrine function in the interaction of animals with their environments. Beyond the usefulness of the communications individually, we hope that they collectively demonstrate the substantial heuristic value of the concept of environmental endocrinology as it was perceived by the participants. We acknowledge gratefully the kindness and sympathy of Professor Jaques ROUZAUD, President of the University of Montpellier II, for his generous extension of the hospitality of the University to the Symposium. We are most grateful to Mrs. Monique VIEU who effected so well the secretarial organization of the Symposium. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
