Sophia Perennis et Universalis, 2003. Paperback. Book Condition: New. English.. 224 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Rene Guenon (1886-1951) is undoubtedly one of the luminaries of the twentieth century, whose critique of the modern world has stood fast against the shifting sands of recent philosophies. His oeuvre of 26 volumes is providential for the modern seeker: pointing ceaselessly to the perennial wisdom found in past cultures ranging from the Shamanistic to the Indian and Chinese, the Hellenic and Judaic, the Christian and Islamic, and including also Alchemy, Hermeticism, and other esoteric currents, at the same time it directs the reader to the deepest level of religious praxis, emphasizing the need for affiliation with a revealed tradition even while acknowledging the final identity of all spiritual paths as they approach the summit of spiritual realization. Guenon's early and abiding interest in mathematics, like that of Plato, Pascal, Leibnitz, and many other metaphysicians of note, runs like a scarlet thread throughout his doctrinal studies. In this late text published just five years before his death, Guenon devotes an entire volume to questions regarding the nature of limits and the infinite, both with respect to the calculus as a mathematical discipline, and to the symbolism of the initiatic path. This book therefore extends and complements the geometrical symbolism Guenon employs in several of his other works, especially *The Symbolism of the Cross*, *The Multiple States of the Being*, and *Symbols of Sacred Science*. A sampling of chapter titles will convey some sense of this remarkable work: *Infinite and Indefinite* , *Degrees of Infinity* , *Zero is not a Number* , *The Law of Continuity* , *Vanishing Quantities* , *Various Orders of Indefinitude* , *The Arguments of Zeno of Elea* , *The True Conception of...*
