RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 44 pages. OCLC Number: (OCOLC)50755852 Subject: Economic assistance, American -- Former Soviet republics. Excerpt: . . . tists, who had devoted their careers to the Soviet state, were left adrift and forced to moonlight to make a living. To the lasting credit of two of my colleagues, Senators Sam Nunn and Dick Lugar immediately recognized the threat posed by a collapsing superpower with thousands of nuclear weapons. They led the way in creating a set of programs known as Cooperative Threat Reduction to help Russia and the other states of the former Soviet Union secure and destroy nuclear warheads, missile launchers and other strategic delivery systems. In 1996, they were joined by Senator Pete Domenici in establishing lab-to-lab programs under the Department of Energy to secure Russian nuclear materials and help its weapons scientists find socially useful careers. Next month, we will celebrate the tenth anniversary of the Nunn- Lugar programs. As we mark that occasion, we must also face the sobering reality that much remains to be done. Lets take a quick look at what still exists in Russia today, a decade after the Soviet Union fell: Approximately 1000 metric tons of excess highly enriched uranium, enough to produce roughly 20, 000 nuclear weapons. Approximately 160 metric tons of excess weapons grade plutonium. Approximately 40, 000 metric tons of declared chemical weapons. According to a recent Carnegie Endowment study, a population of 120, 000 scientists and skilled personnel in the Russian nuclear cities where 58 of those surveyed are forced to moonlight at second jobs and 14 have indicated a desire to work abroad. A little more than a year ago, this Committee heard from Senator Howard Baker and former White House counsel Lloyd Cutler as they...
